

In the Specification:

Please amend paragraph 0001 on page 1 of the specification as follows:

β^1 This is a continuation of Application No. 09/266,727, filed on March 12, 1999, now U.S. Patent No. 6,442,418, which is a continuation of Application No. 08/919,742, filed on August 28, 1997, now U.S. Patent No. 5,885,216, which is a division of Application No. 08/534,081, filed on September 22, 1995, now U.S. Patent No. 5,806,519, which is a continuation of Application No. 08/144,462, filed on October 28, 1993, abandoned, the contents of which are incorporated herein in their entireties.

Please replace the current Abstract of the Disclosure with the following:

β^2 A system for producing an image of a patient preferably includes a source of contrast medium, a pressurizing unit operably associated with the source of contrast medium for injecting the contrast medium into the patient, an imaging unit providing an internal image of the patient based upon a condition of the contrast medium in the patient, a control unit adapted to adjust the condition of the contrast medium injected into the patient, an electronic interface in communication with at least one of the pressurizing unit and the imaging unit, and a fluid path disposed between the pressurizing unit and the patient.
